CAREER SUMMARY

I'm Farooq Khalid, a Senior Webflow Developer and Top-Rated No-Code & AI Automation Specialist with over 7 years of hands-on experience building smart, scalable, and modern web apps. I help startups, agencies, and entrepreneurs bring their ideas to life with powerful tools like Webflow, Bubble.io, n8n, Make, and Zapier, alongside an advanced AI stack including OpenAI (GPT-4o), Anthropic Claude, and Google Gemini. From MVPs to full-scale SaaS platforms, I build products that are visually polished and functionally rock solid. I have successfully delivered 150+ Webflow sites, 100+ Bubble applications, and 45+ AI-driven SaaS products, blending no-code development with intelligent automation, RAG pipelines, and API integrations, faster and more cost-effectively than traditional development. Whether you are launching your next AI tool, streamlining business processes, or automating complex workflows, I am here to help you make it happen.

TECHNICAL SKILLS

❖ Webflow (Senior) | Bubble.io | HTML5 | CSS3 | JavaScript | TypeScript | React JS | Node.js | WordPress | Shopify | jQuery | PHP | Wix | Adalo | FlutterFlow

AI & AUTOMATION SKILLS

❖ OpenAI (GPT-4o, GPT-4) | Anthropic Claude | Google Gemini | Prompt Engineering | RAG Pipelines | Pinecone | Supabase Vector | LangChain | AI Chatbots & Agents | Voice AI (ElevenLabs, Vapi) | n8n | Make (Integromat) | Zapier | Webhooks | REST & GraphQL APIs | Stripe | Airtable | HubSpot

EDUCATION

❖ Bachelor's in Computer Science | CUI Vehari, COMSATS University Islamabad (2016-2020)

WORK EXPERIENCE

❖ **Senior Webflow Developer | No-Code & AI**
Athyra · Full Time (Remote) (2022 - Present)

- As a senior member of Athyna's engineering team, I lead front-end and Webflow initiatives to create user-centric web experiences, specializing in advanced Webflow builds (CMS, Logic, Memberships, animations, Core Web Vitals optimization) alongside Bubble.io. I ship AI-enhanced features across client and internal products, including GPT-powered content tools, AI matching workflows, and automation pipelines built with n8n and Make. I bring coding skills in React JS and TypeScript whenever a build needs functionality beyond visual development, and I mentor junior no-code developers on best practices and safe AI API integration. I collaborate with cross-functional teams to deliver projects on time, exceeding client expectations while balancing No-Code, AI, and code-based solutions.

❖ No-Code Expert | Bubble & Webflow

ArhamSoft (Pvt) Ltd · Full Time (2020 - 2022)

- I collaborated with the ArhamSoft team on a range of projects across industries, honing my expertise in Webflow and Bubble to deliver modern, responsive websites. From crafting prototypes to developing fully functional applications, I successfully managed projects from small business websites to large-scale applications. My focus on No-Code solutions, combined with coding expertise when necessary, allowed me to create scalable, efficient web experiences tailored to client needs. I was recognized internally as Rising Star in June 2021 and August 2021 for delivery quality and growth.

❖ No-Code Expert | Bubble & Webflow

HKS TechLabs · Part Time (2017 - 2020)

- In my role with the HKS team, I built numerous websites and applications, primarily focusing on creating custom web solutions using Bubble and implementing dynamic designs with React JS. My work centered around delivering tailored, No-Code solutions that streamlined businesses' online presence and helped them reach a broader audience. By combining the power of No-Code platforms with my coding skills, I ensured each project was both efficient and scalable.

PORTFOLIO

WEBFLOW PROJECTS

Athyna Website

<https://www.athyna.com/>

- Athyna is an AI-driven global talent platform that connects businesses with vetted remote professionals across roles, engineering, marketing, design, finance, and more, delivering top matches in five days or less while reducing hiring costs and friction.

Currentt

<https://www.currentt.nl/>

- Currentt.nl offers an intelligent energy management system that seamlessly integrates with your home's energy sources and appliances, optimizing consumption in real-time to reduce costs and maximize renewable energy use. The website features engaging Lottie animations that visually demonstrate how Currentt simplifies energy management for homes, offices, and schools.

ScaleBoost

<https://www.scaleboost.co/>

- ScaleBoost is a marketing agency that specializes in creating tailored campaigns by integrating creativity, data insights, and advanced technology to drive business growth. Their website offers both dark and light modes, enhancing user experience across different viewing preferences.

Ziggy's Tech Talent

<https://www.ziggystechtalent.com/>

- Ziggy's Tech Talent is a global recruitment agency that connects businesses with top-tier remote tech professionals, including software engineers, data analysts, and AI/ML experts. They streamline the hiring process by handling resume screening and interviews, ensuring clients find the perfect match without upfront costs.

Broken Arrow Digital

<https://broken-arrow-digital.webflow.io/>

- Broken Arrow Digital is a boutique digital marketing agency led by Natalie, specializing in tailored strategies that drive measurable growth. With over five years of experience, they have helped more than 50 clients achieve 5 to 10x revenue increases through customized, data-driven approaches.

Not Virtual Assistants

<https://www.not-virtual-assistants.com/>

- Not Virtual Assistants is a global talent matchmaking platform that connects businesses with skilled remote professionals across various roles, including tech, marketing, and operations. Rejecting the traditional virtual assistant label, they focus on integrating real, high-impact team members who deliver measurable results.

BUBBLE.IO & AI SAAS PROJECTS

Awardable.io

<https://awardable.io/>

- I developed the Awardable.io application from scratch, handling both the UI/UX design and back-end functionality. The entire design was created by me. The app includes multiple integrations, such as Google and Facebook login, as well as Stripe payment processing. Additionally, I built a comprehensive dashboard where users can manage awards, create tournaments, form teams, and assign awards seamlessly.

Home Care Edge

<https://home-care-edge.bubbleapps.io/version-test>

- I developed Home Care Edge from scratch, handling both the UI/UX design and back-end functionality. The platform features an Indeed job data scraping system, allowing users to submit a location and enter keywords to fetch job listings. The app automatically scrapes job data, including company details, job salaries, and other relevant information, enabling users to easily compare salaries and job opportunities within the platform.

Kati CRM

<https://katicrm.com/>

- Kati CRM is a customer relationship management platform designed to help businesses manage their clients, leads, and sales processes efficiently. I worked on the front-end development and responsiveness of Kati CRM, ensuring a seamless user experience

across all devices. Additionally, I optimized the website's performance for better speed and efficiency.

Mobile Monster

<https://mobilemonster.com.au/>

- Mobile Monster is an online platform that allows users to sell their used mobile phones for instant cash. The website provides a quick and easy process for individuals looking to trade in their old devices while ensuring competitive pricing and fast payments.

AKYSB

<https://akysb.com/>

- AKYSB.com is the official site for the Aga Khan Youth and Sports Board, showcasing events, programs, and community initiatives. Built on Bubble.io for easy updates, dynamic content, and responsive design without coding.

The Spoke Club

<https://the-spoke-club.bubbleapps.io/version-test/index-old>

- The Spoke Club is a Bubble.io application designed to manage sports teams and training sessions. It includes features such as team information, member tracking, attendance recording, financial overviews, and coach management.

CERTIFICATION

❖ **Bubble Developer Certification (Bubble.io)**

Issued: June 2024

- Successfully completed hands-on certification in Bubble visual programming, custom states, workflows, and responsive app design.

❖ **Build a SaaS with Bubble Bootcamp (Udemy)**

Issued: June 2021

- Developed and launched a complete SaaS MVP without code using Bubble, including user authentication, database, and UI/UX best practices.

❖ **Webflow Expert Track (Webflow University)**

Issued: June 2020

- Gained advanced skills in CMS integration, animations, SEO optimization, and responsive layout design.

ACHIEVEMENTS

❖ 🏆 **Bubble.io Developer – Built 100+ Functional Web Applications**

- Delivered custom app logic including user authentication, referral systems, and wallet features for real clients.

❖ 🏆 **Webflow Sites – Delivered 150+ Responsive Websites**

- Built high-quality websites tailored for businesses, portfolios, and landing pages. Focused on clean, human-centered interfaces with cross-device responsiveness. Integrated SEO best practices and client feedback for continuous improvements.

❖ **AI SaaS Specialist – Shipped 45+ AI-Driven Applications**

- Built and launched AI-powered SaaS products combining OpenAI and Claude APIs, vector search, and workflow automation with n8n, Make, and Zapier.

AWARDS

➤ **Rising Star – ArhamSoft, June 2021 & August 2021**

➤ **Google I/O Extended 2024**
